AMINO SILICONE SO-8400 SERIES

Chemical Composition

Modified amino-polysiloxane copolymer

Technical Specification

☆ Appearance: pale yellow or transparent viscous liquid

☆ Ionicity: weak cationic

☆ pH value: 5~8

Properties

Impart soft, resilience smooth handle to cotton, wool, linen, polyester and their blended fabric

Field of application

For cotton, wool, linen, polyester and their blended fabrics

Application

☆ Padding: Dosage: 10~15g/L (30% emulsion), Temperature: room temperature

Process: one dip and one pad or two dips and two pads

☆ Dipping: Dosage: 2~5% (o.w.f) (30% emulsion), Liquor ratio: 1:10~15,

Temperature: 30~40°C, Time: 30min

Storage and Packing

Shelf life: 6 months when store in cool, dry and shaded warehouse

Packing: 120kg plastic drum

O Compatibility of other auxiliaries and process need to be checked before application
